

What is ForeverGreen 24 Karat Chocolate™?

Most people are familiar with the concept of 24 Karat gold as being the purest and most valuable form of gold. Most, however, do not realize that originally the karat system was applied to salt and referred to its purity. In ancient times salt was a medium for trade, a catalyst for wars, and a form of currency. There was 5 Karat salt, 10 Karat salt and so on depending on the amount of dirt or “dross” it contained. The 24 Karat salt was the most pure, prized and valuable.

You can buy chocolate flavored products today that contain little or even no Theobroma Cacao at all. Chocolate has received a bad rap, when in reality it is not the chocolate, rather it is the “dross” (or non pure chocolate) that is the problem. What is the dross in chocolate? It is the refined sugars, fats, waxes, hormone-treated dairy and other non-natural additives that make up the bulk of the chocolate products on the market that are responsible for the anti chocolate attitudes of health-conscious consumers and health practitioners. ForeverGreen now offers a line of 24 Karat Chocolate!

Chocolate Myths

Perhaps you have even heard some of the now-proven myths about chocolate's general effects? These myths include: Chocolate causes migraines Chocolate is bad for the heart Chocolate is an unhealthy food Chocolate gives you acne Chocolate will make you fat Chocolate is a common cause of allergies. Those who have claimed that chocolate was bad for your heart must now face the revelations of its beneficial properties for the heart and circulation. Those who claimed it to be the source of migraines will also face incriminating evidence.

Recent studies have concluded that there is no evidence to implicate chocolate consumption to the etiology of obesity. Similarly, studies show that an ounce of chocolate a day increases good cholesterol levels and helps to prevent the oxidation of bad cholesterol. Current scientific opinion rejects the notion that chocolate is bad for diabetics.

So remember; All chocolate is not created equal. But now you can introduce your friends and family to the happiest health news in years- guilt free, “dross-free” chocolate- ForeverGreen's 24 karat Chocolate Teasers.

Chocolate as a Delivery System

In addition to enjoying the obvious benefits of 24 Karat Chocolate, ForeverGreen had another idea. We designed Chocolate with its top ORAC-rated antioxidant and mood-tuning properties as the delivery system for even more significant wellness-promoting values.

ForeverGreen introduces its 100 percent certified organic Theobroma Cacao product line that has been fortified to enhance Chocolate's natural health, focus, stamina and libido-supporting properties.
